CHAPTER VIII · ACT I

Hold the Ship Together

5 ROUNDS · 4 SYSTEMS

Set each system's track to **0** (Enginarium **2** if drive Crippled). Shuffle the Warp Event deck; **The Pull Lands** is round 5. Each round:

1. Reveal the top event, apply its stress.
2. Triage: at each system you fight, the operative rolls 1d6 vs its target — **hit -2**, **botch +1** (the repair backfires).
3. Spend a special if you like. 4. Any system at **4 fails**.

End: none failed = **Controlled Breach** (+2 Salvage) · one (not Hull) = **Hard Dock** · Hull or 2+ = **Incursion** (Act 2).

You cannot save everything. Choose what burns.
